- Learning C++, The fundamentals of building websites using javascript, html, and Css

Professional Accomplishment:

- **IT Fundamental certified:**
 - Basic knowledge of IT and skills
 - Efficiently use network practices that will keep networks secure
 - Use features and functions of operating system that range windows, MacOS, and kali linux

Work History:

Ludlow Barrett (Runwei)-
(August,2023-September,2023)
(Web Developer)

I worked as a web developer, I used my knowledge of Css, Html, and Javascript to make the website look better and design function to make it user friendly, also it was a remote internship, I learned to use AWS and learned how to take online meeting, and work on my assignments by myself but also communicate with my online co-workers

Professional Projects:

- Resume website(Work in progress)- The website is an interactive website that shows my projects, the ideas and the practices that I use when it comes to html, javascript and the Css design
- Color Flipper website- The website takes the user click and then uses a random number generator and then uses the color number that records the random hex number and uses it as a color whenever the user clicks
- Webscrapes and automation bots- for the internship I was tasked to use selenium that would automatically input the user information that user would give using python, also worked with web scraping that took information in their code and look that

Personal Statement:

I am an adaptive person that will learn anything for a job and put all I have in a project and is willing to learn backend when it comes to api, react, and bootstrap.
